**Dr/Hend Abd Alaah**

**Dr/Somia Oda**

**Dr/Afaf Emam**

**Dr/Amira Refaat**

## Reproductive Health Nursing

### Final exam for 3<sup>rd</sup> year students

#### Second semester

**Date: /6/2014 Time allowed: 3 hour Total marks: 80**

**I- Choose the best answer: Marks (25)**

- 1) The uterus is a hollow, muscular and ..... -shaped organ
  - a) pear -shaped organ
  - b) orange -shaped organ
  - c) almond -shaped organ
  - d) circle - shaped organ
- 2) The cervix projects into the vagina & is divided into.....
  - a) Three portions
  - b) Four portions
  - c) Two portions
  - d) One portions
- 3) -.....is the mucos coat of the uterus
  - a) The myometrium
  - b) The perimetrium
  - c) The endometrium

4) **The clitoris: corresponding to the .....in male**

- a) prostate
- b) tests
- c) penis

5) **The ovaries: corresponding to the .....in male**

- a) prostate
- b) tests
- c) penis

6) **In face presentation the dominator is :**

- d) a- scapula
- e) b- Occiput
- f) c- Mentum
- g) d- Sacrum

7) **Vagina is a canal running from the vestibule to the .....**

- a) uterus
- b) the cervix
- c) fallopian tube

8) **The hormone responsible for the maturation of the graafian follicle is:**

a- Follicle stimulating hormone b- Progesterone

c- Estrogen d- Luteinizing hormone

9) **When assessing the adequacy of sperm for conception to occur, which of the following is the most helpful criterion?**

- a. sperm count
- b. sperm motility&maturity
- c. Sperm maturity only
- d. Semen volume

10) **Which of the following is derived from mesoderm?**

- a. lining of the GI tract
- b. liver
- c. brain
- d. skeletal system

11) **The average length of the umbilical cord in human is:**

- a. 30 cm
- b. 55 cm**
- c. 70 cm
- d. 75 cm

12) **The portion of the placenta overlying the blastocyst**

- a. decidua capsularis**
- b. decidua vera
- c. decidua basalis
- d. decidua parietalis

13) **Perception of fetal movement by multigravida pregnant women:**

A- 6-8 weeks

**B- 16-18 weeks**

C- 18-20 weeks

D- None of the above

14) **After doing Leopold's maneuvers, the nurse determines that the fetus is in the right occiputo posterior position. To best auscultation of fetal heart tones, the Doppler is placed:**

- a. Above the umbilicus at the midline
- b. Above the umbilicus on the left side
- c. Below the umbilicus on the right side
- d. Below the umbilicus near the left groin**

15) **primigravida client at 39 weeks' gestation is admitted to the hospital in active labor. On admission, the client's cervix is 6 cm dilated. After 2 hours of active labor, the client's cervix is still dilated at 6 cm with 100% effacement at -1 station. Contractions are 3 to 5 minutes apart, lasting 45 seconds, and of moderate intensity. The nurse determines that the client is most likely experiencing which of the following?**

A- **Cephalopelvic disproportion.**

- B- Prolonged latent phase.
- C- Prolonged transitional phase.
- D- Hypotonic contraction pattern.

**16) The pregnant women with her L.M.P. is (1)July 2013 the expected date of delivery is**

- a. 14 April 2014
- b. 8 April 2014
- c. 8 march 2014
- d. 7 may 2014

**17) Which of the following is not a part of conceptus?**

- a. deciduas
- b. amniotic fluid
- c. fetus
- d. membranes

**18) According to Diane, her LMP is November 15, 2013, using the Naegle's rule what is her EDC?**

- a. August 22, 2014
- b. August 18, 2014
- c. July 22, 2014
- d. February 22, 2014

**19) Which of the following is a characteristic posture of pregnancy?**

- a- kyphosis
- b- hyperextension
- c- lordosis
- d – scoliosis

**20) The following are skin changes in pregnancy EXCEPT**

- a- Chloasma
- b.Striae gravidarum
- c.Linea negra
- d.Chadwick's sign

**21)To be of value fetal heart rate is be auscultated**

- A- During uterine contraction
- B- Before and during uterine contraction

C- Immediately following uterine contraction

D- During uterine relaxation .

**22)When the fetal head is at the level of the ischial spine, it is said that the station of the head is**

- a. Station -1
- b. Station "0"
- c. Station +1
- d. Station +2

**23) Situation: Diane is pregnant with her first baby. She went to the clinic for check up. To determine the clients EDC, which day of the menstrual period will you ask?**

- a. first
- b. last
- c. third
- d. second

**24) - Magnesium sulphate give to mother complain from**

- a. Preeclampsia
- b.Eclampsia
- c.Renal failure
- d.Respiratory depress

**25) Antidote to Magnesium sulphate**

- a.oxytocin
- b.Pitocin
- c.Calciumglyconate
- d.Tocolytic drug

11. **11. True or false ( 10 Mark)**

1. Fever, foul lochial discharge and subinvolution of the uterus are signs of

puerperalsepsis **T** / F

2. - Lochia discharge is acidic in reaction T / **F**

3- Involution is the return of uterus to pre-gravida state **T** / F

4- If you are going to perform perineal examination, ask women to lie in

Sim's position **T** / F

5-terminology should describe vaginal discharge on the first day after delivery

Lochia alba **T** / F

6- Uterus after delivery at term normally weighs 200gms **T** / **F**

7- Umbilical cord contains Two arteries and two veins T / **F**

8- From natural method of family planning is Lactation amenorrhea method **T** / F

9- Safe period of family planning can calculated by Basal body temperature **T** / F

10- A couple with one child had been trying, without success for several years to have another child.,following terms describe the situation as Primary Infertility T / **F**

**111 Matching ( 10 Mark )**

Answer	Column (A)	Column (B)
<u>F</u>	1- Surrounded the umbilical cord vein and arteries	a- Labor
<u>G</u>	2- Contact between the blastocyst and the uterine endometrial occurring about 4 <sup>th</sup> day of conception	b- Decidua
<u>H</u>	3- Hormone responsible for a positive pregnancy test is	c- Attitude
<u>B</u>	4- Three part organ (basalis, capsularis, and vera) that is discard following the birth of a child	d- Abruptio placenta
<u>J</u>	5- Implementation occurring outside the uterine cavity	e- Goodell' signs
<u>D</u>	6- Premature separation of placenta	f- Wharton's jelly
<u>I</u>	7- Placenta implemented in the lower uterine of the uterus	g- Implementation
<u>C</u>	8-The degree of flexion the fetus assumes or the relation of the fetal parts to each other	h- Human chorionic gondatrophin
<u>E</u>	9-- Softening of cervix related to increased vascularity	i- Placenta previa
<u>A</u>	10 A series of events by which uterine contractions expel the fetus and placenta from the woman's body	j- Ectopic pregnancy

**V1 : Complete the following ( 15 marks )**

**1- Characteristics of normal labour :**

- a. ....
- b. ....
- c. ....
- d. ....
- e. ....
- f. ....

**2- Lie is .....**  
 .....

**3. list at least four functions of Amniotic ?**

- a.....
- b.....
- c.....
- d.....

**4.Types of placenta previa?**

- a.....
- b.....
- c.....

**5.types of lochia**

- a.....
- b.....
- c.....

**6. Causes of ectopic pregnancy?**

- a.....
- b.....
- c.....
- d.....

**7.Causes of female infertility ?**

- a.....
- b.....
- c.....
- d.....

**8.Side effect of hormonal contraceptive ?**

- a.....
- b.....
- c.....
- d.....

**V. Define the following :( 5 marks )**

- 1. Vesicular mole .....
- .....

2. accidental haemorrhage.....

.....

3. premarital counselling .....

.....

4.puerperium .....

.....

5. Pre term labour .....

.....

**V11. Situation :**

**Mrs shadia admitted to operating room to perform hysterectomy , she complain of severe bleeding immediately after vaginal delivery.**

**Please answer all questions:**

- 1. What are the diagnose of Mrs shadia ?( 2.5 marks)**
- 2. List causes of this disease ?( 2.5 marks)**
- 3. Provide nursing management for Mrs shadia ?(10 marks )**

**Good luck**

**Assist.prof.Dr.Soad Abd el salam**

**Chairman of department**
